

FROWEIN GMBH & CO. KG

SchwabEX-Lack waterbase

Use

Control of cockroaches, ants, silverfish, beetles and other crawling pests. National regulations for application and trading have to be observed.

Type

Clear lacquer (LA); aqueous polymer dispersion; ready-to-use.

Active Ingredient

25 g/kg chlorpyrifos

Mode of Action

By contact with lacquer film. Extremely long lasting residual effect.

Special Features

- Aqueous dispersion.
- Excellent action on smooth and porous surfaces.
- The active ingredient is released permanently to the surface.
- No critical contamination of air.
- Resistance to abrasion.
- Application with pressure sprayers is possible.
- Odourless.

Dosage

An exact information on the dosage is not possible as there may be differences regarding to method of construction, furnishing, extent of infestation and structure of surface. 5 - 15 g SchwabEX-Lack per meter are necessary for 10 cm wide bands - depending on surface.- The lacquer should not run off.

Application

SchwabEX-Lack is applied undiluted with broad paint brushes and rollers respectively or it is sprayed. Suitable equipment are SprayBOSS by „808“ or similar pressure sprayers.- Spraying pressure not above 2 bar in order to avoid mist. Important: Clean pressure sprayer after spraying process by all means with water. Before long breaks put nozzle into water (otherwise it will become sticky).

Each room is treated by going round. Apply SchwabEX-Lack as spot treatment on all infested, suspected or endangered locations. We recommend to apply SchwabEX-Lack in bands of 10 to 20 cm width. Pay attention to hollow spaces in and around machines, equipment, cupboards, shelves as well as cracks and crevices around sinks, passages of pipes in walls, etc.

Apply SchwabEX-Lack only on dry and clean surfaces. Do not treat sensitive surfaces (i.e. polishes). Test sensitive objects on unobtrusive places. The lacquer film dries rapidly. After 24 hours at least the lacquer is so dry, that it cannot be removed by normal cleaning procedures.

The long lasting residual effect can last up to one year and more. As this effect depends on several circumstances we cannot guarantee exact periods. Inspect treated rooms after 2 - 4 weeks in order to reach untreated sources of infestations.

Control

Before controlling find out kind and extent of infestation by using adhesive traps and pheromone traps (for example Detektiv S).

Cockroaches

Cockroaches prefer dark hiding places near water and food. Advanced building technique provides a great number of ideal hiding places, as for example built-in furniture, insulating panels, insulating material, double ceilings, linings, conduits, etc. Central heating, bathrooms, dishwashing machines, cooling aggregates, dryers, ovens, boilers, etc. provide the necessary heat.

BIOZIDE

PRODUKTINFORMATION

Caution

Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Keep out of the reach of children and away from food, drink and animal feedingstuffs.

Do not breathe spray mist. Wear suitable protective clothing, gloves and eye/face protection. In case of insufficient ventilation, wear respiratory equipment with filter A1-P3 (40 ASt). This material and its container must be disposed of as hazardous waste. Avoid release to the environment. Refer to special instructions/safety data sheets.

Avoid every unnecessary contact with the product. Misuse may be harmful.- Antidote: Atropine and toxogonine.

All persons except the applicator have to leave the room. Do not apply SchwabEX-Lack in bedrooms, sickrooms or living rooms with bad ventilation. Ventilate rooms thoroughly before using them (until lacquer film is completely dry).

Remove unpacked foodstuffs and feed, domestic cattles and animals as well as toys, exposed dishes and other commodities before application. Cover aquariums and terrariums (shut off ventilating system). Do not apply SchwabEX-Lack on surfaces which are often contacted by skin as well as tables, benches, shelves and other surfaces on which food is laid down, prepared or consumed.

SchwabEX-Lack is not destined for fine atomization and an overall surface treatment.

Avoid contact with fresh, moist deposits. Keep away children and pets. Do not spray on exposed electrical equipment/switches.

Store package tightly sealed in cool places protected from frost. Keep away from waters.

Disposal

Wastes resulting from the use of this product are to be disposed at an approved waste disposal facility. Completely empty packages are to be offered for recycling.

Packaging

Plastic box, cont. 0,9 l.

Plastic-container, cont. 5 and 10 l.

Use biocides safely. Always read the label and product information before use.
