

GREENRANGE®

GreenRange DE

(Recommended by the Association
of Food Inspectors Baden-Württemberg)

GreenRange DE is used for control of bed bugs, red poultry mites, ants, silverfishes, fleas and other crawling insects. Also suitable for use in the food sector (hygiene) as well as in organic farms.

Type:
Aerosol, 500 ml.

Active ingredient:
Diatomaceous earth.

GreenRange DE consists of 100 % diatomaceous earth, a natural mineral extracted from the microscopic shells of fossilized diatoms.

Mode of action:

Biophysical long lasting residual effect.

Special features:

- High effectiveness.
- Suitable for sensitive sectors.
- Long lasting residual effect and protection against new infestation.
- No resistances.
- Without CFC.
- Easy application.
- Approved for use in stables in the presence of animals.
- Approved for organic farming.
- No dust during application – very good adhesion.
