Detmol-Lack

- Translation of the label

Active ingredient

chlorpyrifos (40 g/kg)

Contains xylol (isomer mixture)

Clear lacquer for control of cockroaches, ants and other crawling insect pests. Extremely long lasting residual effect. Protection against reinfestation. It dries rapidly within a few minutes. Ready-to-use.

Flammable! Harmful by inhalation, in contact with skin and if swallowed. Irritating to skin. Risk of serious damage to eyes. Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs. When using do not eat, drink or smoke. Keep away from sources of ignition – No smoking. Do not breathe spray-mist. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Wear suitable protective clothing, gloves and eye/face protection. This material and its container must be disposed of as hazardous waste. Avoid release to the environment. Refer to special instructions/safety data sheets.

Observe the attached product information thoroughly. As we have no influence on handling and application, we warrant for perfect quality only.

Caution

Do not use as a space spray. Avoid contact with fresh, moist deposits. Keep away from children and pets. Do not apply Detmol-Lack in bedrooms, sickrooms or living rooms with bad ventilation. Air rooms thoroughly before using them (until the lacquer film is completely dry).

All persons except applicators have to leave room. Remove unpacked foodstuffs and feed, animals and pets as well as exposed dishes and other commodities before application. Cover aquariums and terrariums (shut off ventilation system). Cover surfaces which are often contacted by skin as well as kitchen utensils, tables, benches, shelves and other surfaces on which food is laid down, prepared or consumed.

Dosage

Depending on the surface 5 - 15 g Detmol-Lack per meter are necessary for 10 cm wide bands. The lacquer should not run off.

Application

Detmol-Lack is applied undiluted with broad paint brushes and rollers respectively. Each room is treated by going round. Apply Detmol-Lack as spot treatment on all infested, suspected or endangered locations. We recommend to apply Detmol-Lack in bands of 10 to 20 cm width. Apply Detmol-Lack only on dry and clean surfaces. Do not treat sensitive surfaces (i.e. polishes, varnishes, some plastics). Test sensitive objects on unobtrusive places. Inspect treated rooms after 2 - 4 weeks in order to reach untreated sources of infestation.

Store container tightly sealed in cool places.

Disposal

Wastes resulting from the use of this product are to be disposed at an approved waste disposal facility. Completely empty packages are to be offered for recycling.

Detmol-Lack is tested according to § 18 Protection against infection Act for control of cockroaches and approved for officially directed disinfestations.

Full effectiveness of the unopened original packing to at least 06/2011.
