

PRODUCT INFORMATION

FOG 5

Use

All-purpose insecticide for control of indoor pests (flies, wasps, moths, cockroaches, silverfish, various beetles etc.). National regulations for application and trading have to be observed.

Type

Fogging preparation, ready for use.

Active Ingredients

Chrysanthemum cinerariaefolium, extract (pyrethrin) 25 % (30 g/l) + piperonyl butoxide (40 g/l).
Contains distillates (crude oil).

Mode of Action

Strong flushing effect with respect to cockroaches. - Rapid knock-down effect after contact with mist droplets respectively the spray deposit. No residual effect. An early repetition of fogging may be necessary in case of hidden or especially resistant pests.

Special Features

- Positive judgement of the natural active ingredient pyrethrum (plant extract).
- Rapid decomposition of the active ingredient. Suitable for application in sensitive sectors; little risk of sustained contamination.
- Impressive but also peculiar method of control.
- Dense, white condensation fog, ultra fine aerosol-particles, several hours in air suspended, even distribution.
- Mild, odourless solvents.

Dosage

Flying insects: 0,5 litre per 1000 m³. Crawling insects: 3 litres per 1000 m³.

Application

FOG 5 is ready for use and to be sprayed with thermal fog generators (IGEBA and others). Before application, close windows, doors and other openings. Shut off fans and air-conditioners as well as fire-alarms.

In case of flying insects it will be sufficient to distribute the fog evenly in the room. In case of crawling insects spot spraying of all infested, suspected or endangered locations intensifies the surety of success. Before application, uncover places of infestation, so that the fog can reach all infested places as easily as possible.

In large rooms, pay attention to fog distribution and obstruction of visibility, that means while fogging go towards the exit.

Rooms must be closed at least for 4 - 6 hours. Afterwards ventilate room thoroughly. - In principle the fogging process should not be used for application in living-rooms.

When to fog

Early pest control prevents the spread of an infestation and by this damages, filth, spoilage and claims. Endangered rooms are to be controlled constantly. Preferably FOG 5 should be applied in the evening after working days - at best during the weekend.

Rooms can be kept free from infestation if FOG 5 is applied periodically. Intervals depend on circumstances.

Cockroaches

In case of cockroach infestation it is best to apply FOG 5 in the evening. FOG 5 should be allowed to act overnight. In any case it is necessary to repeat treatment after 5 weeks in case of German cockroaches respectively 5 months in case of Oriental cockroaches and other large cockroaches. Cockroaches prefer warm and dark hiding places near water and food, for example cracks, crevices and hollow spaces near stoves, refrigerators, sinks and washbowls, tiles, cupboards, shelves, wainscots, door panel linings, baseboards and the like.- Pay also attention to cutting through for pipes, ceiling beams, shafts, etc.

Caution

May be fatal if swallowed and enters airways. Toxic to aquatic life with long lasting effects.

Keep out of reach of children. If medical advice is needed, have product container or label at hand. Do not breathe vapours/spray. Wear protective gloves/protective clothing/eye protection/face protection. IF SWALLOWED: Immediately call a POISONCENTER/doctor. DO NOT INDUCE VOMITING. Avoid release to the environment. Collect spillage. Dispose of contents/container in accordance with local or national laws. Repeated exposure may cause skin dryness or cracking. Vapours may form explosive mixture with air.

To avoid risks to human health and the environment, comply with the instructions for use.

All persons except applicators have to leave the room.

Use universal protective gloves (plant protection), standard protective suit (plant protection), headgear made of solid fabrics with wide brim, rubber apron as well as protective face mask with filter A1-P3 (40 ASt) when spreading/handling the product.

Avoid every unnecessary contact with the product. Misuse may be harmful

Remove unpacked foodstuffs and feed as well as domestic cattles and animals before application. Cover kitchen utensils, tables, machines, vessels, exposed dishes etc. or wash them before use with an alkaline detergent

Air rooms thoroughly before using them.

Do not apply FOG 5 in rooms which serve as a storehouse for agricultural products.

Do not overdose. Do not spray near naked flames or other sources of ignition and do not direct the spray on hot surfaces or on sensitive objects; if in doubt, test compatibility.- Store package tightly sealed in cool places.

Disposal

Wastes resulting from the use of this product are to be disposed of according to national regulations.

Packaging

Plastic container with 5, 10 or 25 litres.
