

Detmol-fum PLUS

Use

Automatic space spray for control of flying and crawling hygiene and material pests. Also suitable for application in the sectors food storage (hygiene). Do not apply the preparation in living rooms and bedrooms.

National regulations for application and trading have to be observed.

Type

Total release aerosol (150 and 300 ml) with special locking valve.

Active Ingredients

Chrysanthemum cinerariaefolium, extract (pyrethrine) 50 % (44,2 g/kg) + piperonyl butoxide (122,3 g/kg).

Mode of Action

Spontaneous and intensive knockdown effect after contact with spray droplets or the fresh spray deposit. No long lasting residual effect. Strong flushing effect with respect to cockroaches.

Special Features

- Application without special equipment and in absence of persons.
- Rapid decomposition of the active ingredient. No residual effect.
- Small risk of residues.

Dosage

Detmol-fum PLUS (150 ml): Crawling insects: 1 can for about 150 m³, flying insects: 1 can for about 1000 m³.

Detmol-fum PLUS (300 ml): Crawling insects: 1 can for about 300 m³, flying insects: 1 can for about 2000 m³.

Application

Wear protective gloves/protective clothing/eye protection/face protection. Wear respirator with filter A1-P3 (40 ASt). Close windows, doors, etc. Expose hiding places of crawling insects if possible. Place can on insensitive sheet in centre of room in elevated position. Arrest valve by pressing down strap of discharge nozzle until it is locked. Leave area. Can sprays empty in about 2 minutes (150 ml) and 5 minutes (300 ml) respectively.

Mist spraying can be interrupted at any time by lifting up the strap with a screwdriver or the like. Mist distributes fast. In large rooms dispersion can be accelerated by using ventilators if necessary.

Treated rooms should be closed over night, but at least 3 hours. Enter areas during exposure period of the product only with a respirator. After altogether 6 hours of thorough ventilation the treated areas are free for intended use. During the treatment measures the rooms/storerooms are to be marked by a warning reference.

When to spray

Early pest control prevents the spread of an infestation and by this damages, filth, spoilage and claims. Endangered rooms are to be controlled constantly. Preferably Detmol-fum PLUS should be applied in the evening after working days - at best during the weekend. Rooms can be kept free from infestation if Detmol-fum PLUS is applied periodically. Intervals depend on the circumstances at the time.

Cockroaches

In case of cockroach infestation it is the best to apply Detmol-fum PLUS in the evening. Detmol-fum PLUS should be allowed to act overnight. Repeat treatment after 5 weeks (German cockroaches) and 5 months (Oriental cockroaches and other large cockroaches) respectively. Cockroaches prefer warm and dark hiding places near water and food. Pay attention to cracks, crevices and hollow spaces near stoves, refrigerators, sinks and washbowls, cupboards, wainscots, ceiling beams, pipe bursts and other utility installations.
