SchwabEX-ban

- Translation of the label

Active ingredient

chlorpyrifos (30,0 g/kg)

Contains isoalkanes C9 – C12.

Clear lacquer for control of cockroaches, ants, silverfish, spiders and other domestic pests. Extremely long lasting residual effect. Special ingredients effect formation of layer, adhering, abrasion resistance and permanent release of the active ingredient to the film surface.

Flammable! Harmful: may cause lung damage if swallowed. Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Harmful if swallowed. Repeated exposure may cause skin dryness or cracking. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs. Do not breathe vapour. Wear suitable protective clothing and gloves during application. In case of insufficient ventilation, wear suitable respiratory equipment with filter A1 – P3 (40 ASt). If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label. Do not empty into drains; dispose of this material and its container in a safe way. Avoid release to the environment. Refer to special instructions/safety data sheets. Application only according to instruction for use. Misuse may be harmful.- Antidote: Atropine and toxogonine.

Do not apply lacquer on surfaces with temperatures above 30 °C. Do not apply in bedrooms, sickrooms or living rooms with bad ventilation. All persons except applicators have to leave room. Avoid contact with fresh deposits. Keep away from children and pets. Air rooms thoroughly during and after application. Afterwards ventilate treated rooms for several days (tilting window).

Remove unpacked foodstuffs and feed, animals and pets as well as exposed dishes and other commodities before application. Cover aquariums and terrariums (shut off ventilation system). Cover surfaces which are often contacted by skin as well as kitchen utensils, tables, benches, shelves

and other surfaces on which food is laid down, prepared or consumed.

Observe the attached product information thoroughly. As we have no influence on handling and application, we warrant for perfect quality only.

Equipment

SchwabEX-ban is applied by wide paint brush and rollers respectively or it is sprayed. Suitable equipment is the SprayBOSS by „808“ or similar pressure sprayers.- Spraying pressure not above 2 bar in order to avoid mist.

Dosage

An exact information on the dosage is not possible as there may be differences regarding to method of construction, extent of infestation and furnishing. Depending on kind of surface 3 - 18 g SchwabEX-ban per meter are necessary for 10 cm wide barriers.

Application

Apply SchwabEX-ban as spot treatment on all infested, suspected or endangered locations. Pay attention to cracks and hollow spaces, etc. Foci of infestation are often dark and warm hiding places near water and food (for example cracks and crevices around stoves, ovens, dishwashing machines, backsides of refrigerators).

SchwabEX-ban is not destined for fine atomization and space misting.

Disposal

Wastes resulting from the use of this product are to be disposed at an approved waste disposal facility. Completely empty packages are to be offered for recycling.

p.t.o.

BIOZIDE
