

FROWEIN GMBH & CO. KG

SchwabEX-spray

Use

Control of cockroaches, beetles and other crawling domestic pests. National regulations for application and trading have to be observed.

Type

Aerosol, 400 ml.

Active Ingredients

Permethrin (11,3 g/kg) + dichlorvos (8,7 g/kg) + pyrethrum extract 25 % (3,4 g/kg).

Mode of Action

Strong flushing effect and rapid knockdown effect after contact with spray droplets. Long lasting residual effect by contact with spray deposit.

Special Features

- Spot spraying by using extension tube.
- Rapid and even distribution of the active ingredient into hiding places of pests owing to active diffusion (dichlorvos).

Dosage

Detailed information on dosage cannot be given as there may be differences regarding to construction, kind and density of inventory and degree of infestation.

Application

Press on attached discharge nozzle (with extension tube). Disclose hiding places of insects if possible. Treat all infested locations by going round. Spray SchwabEX-spray directly into hiding places of pests, on surfaces traversed by insects and suspected surfaces respectively. Do not wet sensitive surfaces (for example polishes, varnishes, some plastics).

Prevention

Measures to prevent an infestation and its spread respectively are of importance. Part of these measures are for example closing or elimination of suspected hiding places, hygienic conditions owing to regular cleaning, control of incoming goods, optimal

storage conditions, clear storekeeping, inspection of rooms at regular intervals and last but not least early control measures.

Control

Before each pest control find out kind and extent of infestation by using adhesive traps and pheromone traps (for example Detektiv S).

Cockroaches

Cockroaches prefer warm and dark hiding places near water and food. Advanced building technique provides a great number of ideal hiding places, as for example built-in furniture, insulating panels, insulating material, double ceilings, linings, conduits, etc. Central heating, bathrooms, dishwashing machines, dryers, ovens, boilers, etc. provide the necessary heat.

If harbourages are sprayed, cockroaches leave them and are knocked down immediately. Pests traversing sprayed surfaces are killed by persistent residues for some weeks.

Repeat treatment after 5 weeks (German cockroaches) and 5 months respectively (Oriental cockroaches) in order to control newly hatched nymphs. Later invading cockroaches should be controlled as soon as possible in order to prevent the spread of infestation.

Caution

Highly inflammable.- Harmful by inhalation. May cause sensitisation by skin contact. Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Repeated exposure may cause skin dryness or cracking. Keep out of the reach of children and away from food, drink and animal feedingstuffs. When using do not eat, drink, smoke. Do not breath aerosol.

BIOZIDE

PRODUKTINFORMATION

In case of insufficient ventilation, wear suitable respiratory equipment with filter A1-P3 (40ASt). Wear suitable protective clothing (for example "808" Overall light) and protective gloves during application. After contact with skin, wash immediately with plenty of water and soap. If swallowed, seek medical advice immediately and show the can or label.- Contains dichlorvos. May produce an allergic reaction. Avoid release to the environment. Refer to special instructions/safety data sheets. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point.

Do not use as a space spray. All persons except the applicator have to leave the room. Remove unwrapped foodstuff and feed, animals and pets before application. Cover kitchen utensils, exposed dishes, benches or wash them before use with an alkaline detergent and plenty of water.

Avoid contact with fresh, moist deposits. Keep away children and pets.

Do not directly spray on electrical equipment or their surrounding. Excessive spraying in small rooms or local overdoses may lead to an explosive air/gas mixture. Do not spray longer than 3 seconds in small rooms and respectively hollow spaces (for example storerooms, cupboards, etc). Ventilate rooms during application. Air rooms thoroughly before using them.

Official recommendation for pyrethroids:

In case of intensive skin contact (especially of the face) the product can cause a tickling sensation without external irritative symptoms. The occurrence of this irritation is a warning; discontinue use. Get medical attention if symptoms persist or develop or if further symptoms occur.

Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material. Keep away from sources of ignition – No smoking.

Disposal

Wastes resulting from the use of this product are to be disposed to an authorised waste collection point.

Completely empty packages are to be offered for recycling.

Packaging

Carton with 12 cans à 400 ml.

Use biocides safely. Always read the label and product information before use.
