

PRODUCT INFORMATION

SchwabEX-spray

Use

Control of cockroaches, beetles and other crawling pests.

National regulations for application and trading have to be observed.

Type

Aerosol, 400 ml.

Active Ingredients

Permethrin (11,3 g/kg) + prallethrin (2,1 g/kg) + chrysanthemum cinerariaefolium, extract (pyrethrine) 25 % (27 g/l).

Mode of Action

Strong flushing effect and rapid knockdown effect after contact with spray droplets. Long lasting residual effect by contact with spray deposit.

Special Features

- Spot spraying by using extension tube.
- Rapid and even distribution of the active ingredient into hiding places of pests.

Dosage

Detailed information on dosage cannot be given as there may be differences regarding to construction, kind and density of inventory and degree of infestation.

Application

Press on attached discharge nozzle (with extension tube). Disclose hiding places of insects if possible. Treat all infested locations by going round. Spray SchwabEX-spray directly into hiding places of pests, on surfaces traversed by insects and suspected surfaces respectively. Do not wet sensitive surfaces (for example polishes, varnishes, some plastics).

Prevention

Measures to prevent an infestation and its spread respectively are of importance. Part of these measures are for example closing or elimination of suspected hiding places, hygienic conditions owing to regular cleaning, control of incoming goods, optimal

storage conditions, clear storekeeping, inspection of rooms at regular intervals and last but not least early control measures.

Control

Before each pest control find out kind and extent of infestation by using adhesive traps and pheromone traps (e.g. Detektiv S).

Cockroaches

Cockroaches prefer warm and dark hiding places near water and food. Advanced building technique provides a great number of ideal hiding places, as for example built-in furniture, insulating panels, insulating material, double ceilings, linings, conduits, etc. Central heating, bathrooms, dishwashing machines, dryers, ovens, boilers, etc. provide the necessary heat.

If harbourages are sprayed, cockroaches leave them and are knocked down immediately. Pests traversing sprayed surfaces are killed by persistent residues for some weeks.

Repeat treatment after 5 weeks (German cockroaches) and 5 months respectively (Oriental cockroaches) in order to control newly hatched nymphs. Later invading cockroaches should be controlled as soon as possible in order to prevent the spread of infestation.

Caution

Extremely flammable aerosol. Pressurised container: May burst if heated. May cause an allergic skin reaction. Very toxic to aquatic life with long lasting effects.

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/ 122 °F. Avoid breathing vapours/spray. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/protective clothing/eye protection/face protection. IF ON SKIN: Wash with plenty of water. Specific treatment (see on this label). If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Avoid release to the environment. Collect spillage.

Dispose of contents/container according to national regulations.

Repeated exposure may cause skin dryness or cracking. Vapours may form explosive mixture with air.

Do not allow to enter sewers or surface water.

This biocidal product contains permethrin which is dangerous to bees and other pollinators.

Use indoors only in small areas in cracks and crevices.

Use only in places, that are not regularly wet cleaned.

Do not use as a space spray. All persons except the applicator have to leave the room. Remove unwrapped foodstuff and feed, animals and pets before application. Cover kitchen utensils, exposed dishes, benches or wash them before use with an alkaline detergent and plenty of water.

Avoid contact with fresh, moist deposits. Keep away children and pets.

Do not directly spray on electrical equipment or their surroundings. Excessive spraying in small rooms or local overdoses may lead to an explosive air/gas mixture. Do not spray longer than 3 seconds in small rooms and respectively hollow spaces (for example storerooms, cupboards, etc.). Ventilate rooms during application. Air rooms thoroughly before using them.

Official recommendation for pyrethroids:

In case of intensive skin contact (especially of the face) the product can cause a tickling sensation without external irritative symptoms. The occurrence of this irritation is a warning; discontinue use. Get medical attention if symptoms persist or develop or if further symptoms occur.

Disposal

Wastes resulting from the use of this product are to be disposed according to national regulations.

Packaging

Carton with 12 cans à 400 ml.
