PRODUKTINFORMATION

FROWEIN GMBH & CO. KG

Contrax-Monitor

Use
For inspection and proof of rat infestation outside – for permanent monitoring according to the „Guidelines of good professional practice for the application of baits for rodent control with anticoagulants by professional users and trained/certified users".

Type
Paper wrapped wax block, 220 g

Active ingredient
Without active ingredient. Non-toxic-bait.

Mode of action
No rodenticide effect. Exclusively for detection of rat infestation.

Special features

- Highly attractive block bait for rats.

- Sufficient portion to assess a potential infestation correctly: for distinction of rodent activity (mouse and/or rat).

- Very resistant against spoilage.

- An embedded wire in the block makes it easy to fix in bait station.

- Resistant to mould: with preservatives – therefore also effective against germs and fungi in low concentration. This leads to a long-lasting protection.

Dosage
1 – 2 blocks per bait station.

Application
The blocks are placed with the paper wrap. Regularly check the consumption. No consumption: still check the consumption periodically and renew the bait points, if necessary. Consumption: = infestation. Remove and dispose the remains of Contrax-Monitor properly and replace it with rodenticide containing active ingredient.
The „Guidelines of good professional practice for the application of baits for rodent control with anticoagulants by trained/ certified users and professional users" that are mentioned on the website of the German Federal Institute for Occupational Safety and Health have to be observed.
The directions for use our rodenticides apply for Germany. These may vary from country to country. Therefore, national regulations of application have to be observed.

Packaging
Carton with 75 blocks à 220 g (16,5 kg).
